

Tree Adjoining Grammars

The XTAG Project

Laura Kallmeyer & Benjamin Burkhardt

HHU Düsseldorf

WS 2017/2018

The XTAG-project

... was located at the University of Pennsylvania (ca. 1988-2001)

... created the following components:

- **Grammar** (set of tree templates/families)
 - **Tools** (browser, editor, parser, ...)
-
- URL: <http://www.cis.upenn.edu/xtag/>
 - Manual: XTAG Research Group [2]

The architecture of the XTAG-grammar

Morph database	→	inflected form → root form, POS, inflectional information
Syntactic database	→	root form, POS → list of tree templates or tree families, list of feature equations
Tree database	→	list of tree templates and tree families

Example: **Tree template** for the declarative transitive verb ($\alpha n x 0 V n x 1$), where \diamond marks the lexical insertion site:

The architecture of the XTAG-grammar

Morph database → inflected form → root form, POS, inflectional information

Syntactic database → root form, POS → list of tree templates or tree families, list of feature equations

Tree database → list of tree templates and tree families

Example: **Tree template** for the declarative transitive verb ($\alpha n x 0 V n x 1$), where \diamond marks the lexical insertion site:

The architecture of the XTAG-grammar

Morph database	→	inflected form → root form, POS, inflectional information
Syntactic database	→	root form, POS → list of tree templates or tree families, list of feature equations
Tree database	→	list of tree templates and tree families

A tree family

- is a set of tree templates,
- represents a subcategorization frame, and
- unifies all syntactic configurations the subcategorization frame can be realized in.

Example: $\alpha_{nx0}V_{nx1} \in T_{nx0}V_{nx1}$

The architecture of the XTAG-grammar - Counts

subcategorization frame	# tree fam.	# tree temp.
intransitive	1	12
transitive	1	39
adjectival complement	1	11
ditransitive	1	46
prepositional complement	4	182
verb particle constructions	3	100
light verb constructions	2	53
sentential complement (full verb)	3	75
sentential subject (full verb)	4	14
idioms (full verb)	8	156
small clauses/predicative	20	187
equational 'be'	1	2
ergative	1	12
resultatives	4	101
it clefts	3	18
total	57	1008

(from Prolo [1])

Lexical insertion

Lexical insertion

Drawing an edge between the lexical anchor and the lexical insertion site

- prior to substitution and adjunction
- The feature structures of the **lexical anchor** and the **insertion site** unify.

Morph database

precipitate	precipitate	N 3sg#precipitate	A#precipitate	V INF

Example: complementation with NPs and PPs (base cases)

Complementation with NPs:

$\alpha n x 0 V$:

$\alpha n x 0 V n x 1$:

$\alpha n x 0 V n x 2 n x 1$:

Complementation with PPs: substitution or co-anchor

$\alpha n x 0 V n x 1 p n x 2$:

$\alpha n x 0 V n x 1 P n x 2$:

Example: complementation with NPs and PPs (base cases)

Complementation with NPs:

$\alpha n x 0 V$:

$\alpha n x 0 V n x 1$:

$\alpha n x 0 V n x 2 n x 1$:

Complementation with PPs: substitution or co-anchor

$\alpha n x 0 V n x 1 P n x 2$:

$\alpha n x 0 V n x 1 P n x 2$:
